

artificiel**Beyond6281**
TECHNICAL RIDER
kamut@artificiel.org

IMPORTANT NOTICE: beyond6281 is an installation which has an important but very fragile sound. It produces acoustic levels similar to a whisper, and the general feel of the thing is introspective. It is thus essential to be physically separated from other artistic works with walls and doors. Curtains, no matter how heavy, does not fit the bill.

[A] PROVIDED BY THE PRODUCER

Silent venue (away from other amplifiers if they have fans)
AC wire (black, flexible, 2 conduction, 15 amp)
One (1) day tech help (carpenter) for the setup
Five (5) channels of power amp, 750W @ 8ohms
5.1 DVD player or other looping multichannel system
Small budget for room adaptations materials

[B] PROVIDED BY THE ARTIST

Five (5) 1000W lamps + three (3) spares
Five (5) ceramic sockets
Audio source on appropriate media

[C] SCHEDULE

The installation has a strong in-situ flavor. In order to maximize the artistic and sonic integrity of the installation, we require two (2) full days of complete access to the space before the opening. The technician must be available at all times during the first day. In order to plan the setup it is imperative we are provided with pictures and a plan of the space at least seven (7) days before our arrival.
